

St. Joseph High School Preparatory Program

Is your grade school student prepared for a quality academic experience in high school? It all starts with the proper preparation in grade school.

St. Joseph Grade School, Randolph is pioneering a program that gives your young student a solid background and a great head start. The program runs in grades 5, 6, 7, and 8. One can enter the program at any of these ages, even as late as 8th grade. Open to all faiths.

St. Joseph School uses the approved State curriculum but improves it by tailoring teaching to the student and adding many elements that enhance high school and future college success.

A skill assessment exercise is administered to determine each student's areas of strength and the areas of challenge. We shall emphasize the strength areas and make certain the weaker areas advance. **Small classes ensure participation.**

Our theme is: *Eloquentia Perfecta* – the ability to express one's self with excellence in writing, elocution, art, and music. We recognize that the cell phone culture and social media often diminish quality interpersonal exchanges. We promote insightful and noble communication.

Math and Advanced Math: quantitative abilities are important in many further studies and in the business of life. For students who enjoy, there is advanced math; for those who find math a heartburn, teach math understandably with humor.

Additional elements at St. Joseph are COSI from Columbus, Academic Clubs and field trips. This is a year of excitement and journey for your advancing youngster.

During 2016 we will limit each grade of High School Preparatory to twelve students. We explore together.
